<https://github.com/bggo>

Linux, Shell Script, Python

I'm passionate about FOSS, collaboration and the impact of technology in people's and companies lives . In the past year I've made some major moves on my personal life and my next big step its to review the industry I've been working for almost a decade. Looking forward I seek an opportunity in the tech industry where I can use my technical skills together with business strategy to help companies to have a better place in our society. .
